CUSTOMER-ORIENTED FORESIGHT FOR FLEXIBLE TROUBLE-SHOOTERS

YOUR PROPULSION EXPERTS

Welcome on board. Our passions are azimuthing propulsion and manoeuvring systems as well as complete propulsion systems for vessels of all sizes and types. These innovative system solutions are developed, built and produced in Spay am Rhein, Dörth and Wismar (Germany). We also have 13 additional sites which manage sales across all five continents. The international shipping industry has benefited from our global coverage for over 90 years.

SERVICE TECHNICIAN (M/F/D) Field service

APPLY

Responsibilities and duties:

Our customers' ships sail all seven seas. So of course that means we're there wherever they are. All over the world the shipping industry relies on the uncompromising quality of our propulsion systems and on our know-how, experience and our outstanding problem solving abilities of our service professionals.

- Complete repair and installation work
- Perform maintenance and service work
- Determine the extent of damage and repairs in case of warranty
- Identify the causes and undertake error diagnostics for propulsion systems with mechanical, hydraulic, pneumatic and electrical components
- Carry out modifications with ease and confidence
- Demonstrate your value as a partner to clients using clear and comprehensible instructions and systems operation

Qualifications:

- Successfully completed training as a mechanical engineer, systems engineer or similar qualification
- Course in Electronics, Electromechanical, Mechatronic or similar
- Relevant work experience
- Extremely client and service-focused
- Autonomous and responsible way of working
- Good written and spoken English
- Willing to travel worldwide

Here's what awaits you at SCHOTTEL:

- Promoting your personal and professional competencies
- A friendly environment where a proactive approach is valued
- Systematic additional education at SCHOTTEL academy
