

Upgrade of old SRP 500 / 1100 series with new SRP 1010 / SRP 1212

Sample tractor tug SRP 503/505

New SRP 1010

Advantages:

Customized solution, hence:

- Keeping existing well installation, less modification required
- Adaption to existing shaft line, no change of engine position required
- New clutch directly mounted at SRP, old type K-503 no longer needed
- Upgrade of existing steering system
- Thrust increase with total bollard pull of over 45 tons possible (depd. on engine)
- Enhanced service and spare parts supply

Even upgrade solutions with other designs,
like type SRP1100 to SRP1215 could be realized.
