

YOUR PROPULSION EXPERTS

SCHOTTEL Training Center

Fremantle Western Australia

Profit from the brand new SCHOTTEL Training Center in your area that has the ability to deliver an innovative and unique type of crew training.

The first of its kind for SCHOTTEL worldwide, the new training center links a fully functional live control system to a tug simulator.

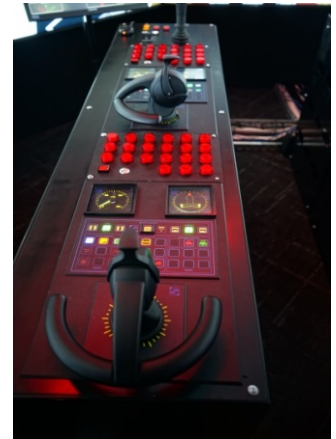

For enquiries please contact us at: msghonem@schottel.com.au

Your SCHOTTEL benefits:

- We provide training for the crew (skippers and engineers) on a fully functional control system in a safe and stress free environment.
- Troubleshooting and fault finding exercises for engineers on a live system.
- Failures and emergency control scenarios for Skippers on the simulator.
- Customized courses based on specific vessels and owner requirements.
- Classroom trainings and system familiarization.

The system can simulate extensive range of failures during operation allowing the crew to handle different situations.
