SCHOTTEL S-COM CONDITION MONITORING FOR ENHANCED PREDICTIVE MAINTENANCE

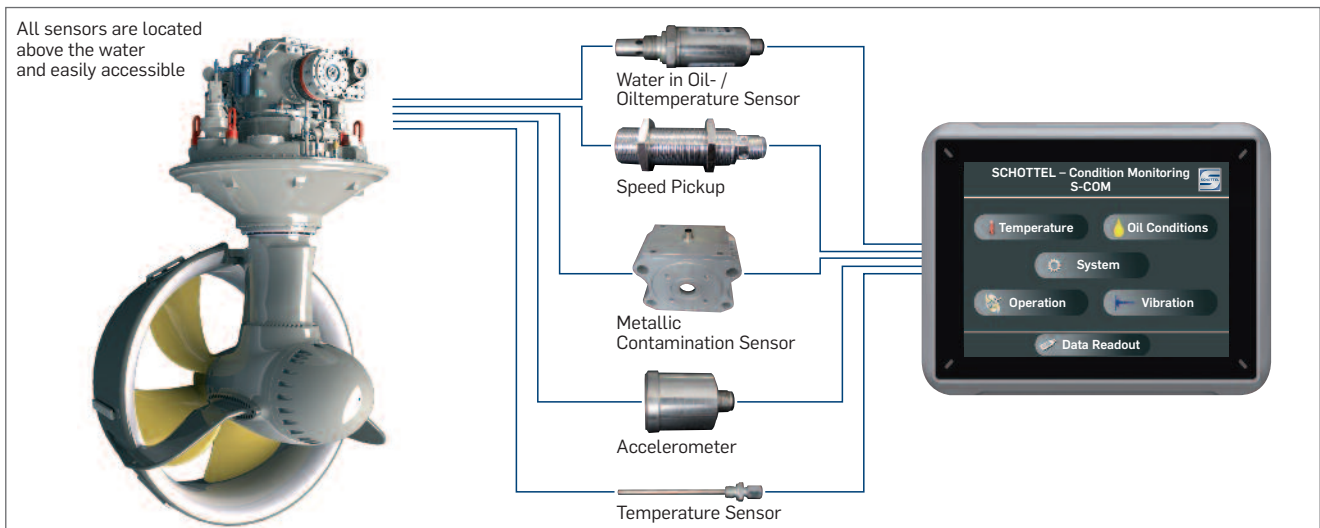

SCHOTTEL CONDITION MONITORING S-COM

The SCHOTTEL Condition Monitoring System (S-COM) is used to measure various machine parameters of SCHOTTEL propulsion systems. All measured values are recorded in a data logger aboard the vessel.

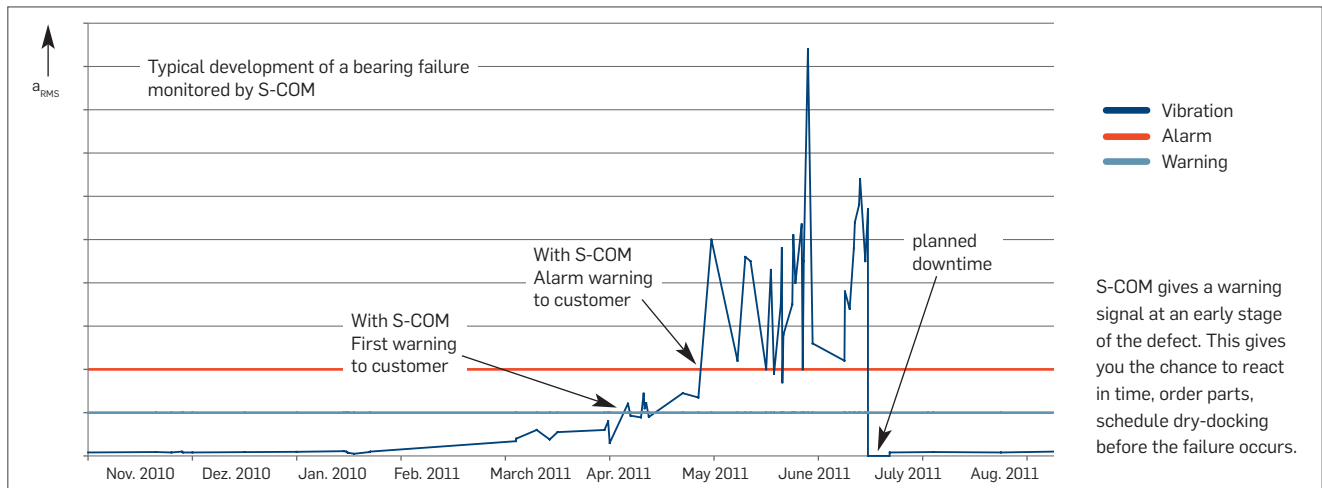

S-COM is designed to the needs of the shipping industry. The conditions of a ship are taken into consideration. The S-COM sensors, for example, are located above the water and are easily accessible for service staff.

SCHOTTEL offers planning, configuration and implementation of the system. We will keep you up to date with a tailor made report on all important machine conditions.

	ADVANCED		BASE	
Data transmission	Automatic		By customer	
Way of Data transmission	Internet	Phone card	Email	USB Stick
S-COM Report	Automatic		On request	
Event Reporting	Automatic		—	
Off-hire period			Short	
Monitoring time			24/7	
S-COM upgrade			Without docking	
Sensors	Water in oil, temperature, x/y/z-accelerometer, particles in oil, metallic contamination, etc.			

ENHANCED PREDICTIVE MAINTENANCE

Each rotating part (e.g. a bearing) in the unit creates specific frequencies. Any change in these frequencies can give evidence to wear or possible damage, which can then be detected at an early stage. Having this information available you will have the time for comprehensive planning and adequate action.

Particles in oil are always an early indication of wear. Our permanent analysis enables you to identify the machine conditions. Monitoring the water content can also help you to detect damage to seals possibly caused by foreign objects such as fishing ropes, etc. A report will provide you with all important data you need to keep your thruster in perfect condition. This will give you enough time to react before anything becomes critical. Together with SCHOTTEL the necessary action can be planned and executed.

PSV BOURBON MISTRAL
2 x SCHOTTEL Combi Drive Type SCD 2020 (2200 kW each)

128 T BP OFFSHORE TUG LUZ DE MAR
2 x SCHOTTEL Rudderpropeller Type SRP 3040 CP (3840 kW each)

DOUBLE-ENDED FERRY BERGENSFJORD
4 x SCHOTTEL Combi Drive Type SCD 2020 (2750 kW each)

PROFESSIONAL PARTNERSHIP – THROUGHOUT THE VESSEL'S LIFE

As a SCHOTTEL customer, you benefit from individual, in-depth advice and support at all stages of a project, from planning and commissioning through to preventive maintenance.

A dense worldwide service network is ready to offer assistance and ensures the swift supply of spare parts – along with experienced SCHOTTEL technicians if required.

The name of SCHOTTEL traditionally stands for quality in engineering, with over 90 years of experience in design and the precision workmanship of a family-owned enterprise. Our innovative propulsion systems are a byword for reliability and high performance and set standards in global shipping.
